TUTORIAL 3

1. What is ERD?
2. List FOUR types of relationship in ERD.
3. List FIVE entity for restaurant.
4. List FIVE attributes for BUILDING, CAR and T-SHIRT.
5. Identify the relationship and draw the relationship for the following situation:
 - a A student attend many classes on weekdays.
 - b Many employees has join the company meeting.
 - c Many players in the Red Team have joined many tournament around the world.
 - d The mother has prepared breakfast to her son.
6. A manufacturing company produces products. The following product information is stored: product name, product ID and quantity on hand. These products are made up of many components. Each component can be supplied by one or more suppliers. The following component information is kept: component ID, name, description, suppliers who supply them, and products in which they are used.
 - i. Create an ERD to show how you would track this information.
 - ii. Show entity names, primary keys, attributes for each entity, relationships between the entities and cardinality.
7. Create an ERD diagram using Chen's notation for the scenario given below.

Prepare an ERD for a real estate firm that lists property for sale. The following describes this organization:

The firm has a number of sales offices in several states. Attributes of sales office include Office_Number(identifier) and Location

Each sales office is assigned one or more employees. Attributes of employee include Employee_ID(identifier) and Employee_Name. An employee must be assigned to only one sales office.

For each sales office, there is always one employee assigned to manage that office. An employee may manage only the sales office to which he/she is assigned.

The firm lists property for sale. Attributes of property include Property_ID(identifier) and Location. Components of Location include Address, City, State and Zip_Code.

Each unit of property must be listed with one (and only one) of the sales offices. A sales office may have any number of properties listed, or may have no properties listed.

Each unit of property has one or more owners. Attributes of owners are Owner_ID(identifier) and Owner_Name. An owner may own one or more units of property. An attribute of the relationship between property and owner is Percent_Owned.

The best is now made
