SEGi UNIVERSITY

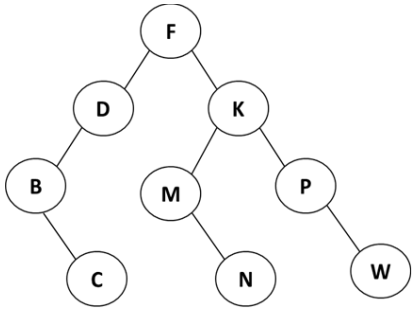

BCC1313 – ALGORITHMS & COMPLEXITY

Tutorial 6

1. What are the preorder, inorder, and postorder for the following trees:
   a) Tree A

   b) Tree B

2. Assume an empty binary tree. Insert the following values in the order given:

   a) 14, 23, 7, 10, 33, 56, 80, 66, 70

   b) 7, 10, 14, 23, 33, 56, 66, 70, 80

   c) D, A, T, R, M, C, B, O

   d) A, T, R, M, C, B, O

   e) 9, 12, 3, 77, 32, 11, 20

3. Build an ADT binary tree by following the statements below:

```
tree1.setRootData(2)
tree1.attachLeft(1)
tree2.setRootData(3)
tree2.attachLeftSubtree(tree1)
tree3.setRootData(4)
tree3.attachLeftSubtree(tree2)
tree3.attachRight(5)
tree4.setRootData(6)
binTree.createBinaryTree(7, tree3, tree4)
```
