FACULTY OF ENGINEERING, BUILT ENVIRONMENT, AND INFORMATION TECHNOLOGY (FOEBEIT)

DTL1344 - WEB AND MOBILE SYSTEMS

FINAL ASSESSMENT

PROJECT DEVELOPMENT (40%)

INSTRUCTIONS TO CANDIDATE:

1. This is an **INDIVIDUAL** assessment.
2. This assignment contributes **40%** of the total course mark.
3. Submit your completed assessment via **SPARK** by **2 August 2026**.
4. **Late submission** will follow SEGi University's assessment policy.

WARNING

You are required to submit your work within the bounds of the University Infringement of Assessment Regulations. Plagiarism, paraphrasing and downloading large amounts of information from external sources will not be tolerated and will be dealt with severely.

SEGi University, Kota Damansara takes allegations of plagiarism very seriously. Submissions involving plagiarism will be marked but given zero mark. Plagiarism is the attempt to pass off the work of another as your own. Information taken from the work of others should be acknowledged by reference to obviate the charge of copying.

The work must be entirely your own. You will receive ZERO (0) for work that is not your own. The safety of your assessments is your responsibility. You must not permit another student access to your work.

OBJECTIVE

This assessment aims to develop students' ability to implement and develop a functional web or mobile application system based on the approved project proposal. Students will apply programming knowledge, UI/UX design principles, and system development skills to transform ideas into a working application prototype.

LEARNING OUTCOMES

Upon successful completion of this assessment, students will be able to:

1. Develop a functional web or mobile application based on a proposed project idea.
2. Apply programming concepts in real system implementation.
3. Design and implement user interfaces for web or mobile application.

TASK DESCRIPTION

Students are required to develop a **fully functional web or mobile application** based on your approved **Assignment 1: Project Proposal**. The application must be developed using appropriate tools or frameworks such as Flutter, Android Studio, HTML/CSS/JavaScript, Firebase, or other approved technologies. The final system should demonstrate real functionality, usability, and effective UI/UX design.

DEVELOPMENT REQUIREMENTS

Your application must include the following:

1. **System Implementation**
    - Fully functional web or mobile application
    - Must strictly follow the approved proposal scope and design
    - All main features stated in the proposal must be implemented
    - Proper navigation between pages or screens
2. **User Interface (UI) & User Experience (UX)**
    - Clean, consistent, and user-friendly interface
    - Proper layout, alignment, and visual hierarchy
    - Responsive design (web) or adaptive design (mobile)
    - Smooth navigation and usability

3. **Application Features**
    - Implementation of all core features from the proposal
    - Interactive components (buttons, forms, inputs, etc.)
    - Input validation and error handling
    - Basic CRUD functionality where applicable
4. **Data Handling / Storage (if applicable)**
    - Use of local storage or cloud database
    - Proper implementation of data create, read, update, and delete operations.

DELIVERABLES

Students are required to submit all components below as a complete package. Incomplete submission may affect marks awarded.

1. **Final Working Application**

   Students must submit a fully functional application developed based on the approved proposal. The running application must be provided in one of the following formats:
    - Mobile Application: APK file (Android) or installable build
    - Web Application: Hosted link or runnable local setup with instructions
    - Cross-platform project: Fully functional emulator-ready or deployment-ready project
2. **Final Report (5 – 10 pages)**

   Students must prepare a technical report documenting the application. The report should be clear, structured, and supported with relevant screenshots. The report must include:
    - Introduction of the developed application
    - Aims and objectives
    - Target users
    - Technologies and tools used
    - Explanation of implemented features
    - Screenshots of application screens/pages
    - Challenges faced and solutions implemented

ASSESSMENT CRITERIA

Component	Description	Marks
System Functionality	Completeness of implemented features based on proposal and correct system workflow	**30%**
User Interface (UI/UX)	Design quality, usability, consistency, and responsiveness	**20%**
Technical Implementation	Code structure, framework usage, and basic system design quality	**20%**
Data Handling & Integration	Basic database or storage implementation (CRUD if applicable)	**10%**
Report & Documentation	Clarity, completeness, and quality of final report with screenshots	**20%**
Total		**100%**

SUBMISSION GUIDELINES

1. Submit your work as a PDF file or embedded images in a Word document.
2. Save your file using the format: **studentName_ID_Final Assignment.pdf.**
3. If multiple files are submitted, compress them into a single ZIP file.
4. Submit via **SPARK** before the deadline.
